PROFESSIONAL SUMMARY

Full Stack & Mobile Developer with a strong record of delivering scalable web and mobile applications across healthcare, education, and e-commerce. Proficient across the entire development stack from pixel-perfect frontends to robust backend APIs and cross-platform mobile apps. Committed to writing clean, performant code and building user-centered products with measurable real-world impact.

TECHNICAL SKILLS

Languages & Frameworks

HTML, CSS, JavaScript, TypeScript, React.js, Next.js

Backend

Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Supabase, Firebase, Prisma

Mobile

React Native (Expo), Flutter (Dart)

UI & Styling

Tailwind CSS, Styled-Components, Shadcn UI, Framer Motion

State & Data

Redux, React Query, REST API

Tools & Platforms

Git, GitHub, Vercel, Figma, CI/CD, System Design, Paystack Integration

WORK EXPERIENCE

Frontend Engineer (Contract) | [ScribbleGreen Tech](#) | April 2026 – Present

- Built and maintained dashboard modules with authentication systems and backend API integrations.
- Performed unit testing and participated in peer code reviews to maintain code quality.
- Collaborated closely with backend engineers for full-system integration and performance optimization.
- Delivered production-ready documentation and comprehensive handover support.

Full Stack Developer (Contract) | [30Century Nigeria](#) | December 2025 – Present

- Engineered a Wedding RSVP system handling guest management, invitations, and event coordination workflows.
- Developed a School Information System (SIS) to streamline academic records and administrative operations.
- Designed responsive UIs and integrated backend services, improving application scalability and performance.

Full Stack Developer | [NeoCloud Technology](#) | July 2024 – October 2025

- Built and maintained four production applications: GameNova Web Store, To-Do App, Quiz App, and a Real Estate listing platform.
- Developed responsive UIs with React.js and Next.js, increasing usability and user engagement across products.
- Implemented RESTful backend APIs with Node.js and Express.js, integrating MongoDB and MySQL databases.
- Optimized application performance and delivered features on schedule through close team collaboration.

PROJECTS

Foodie Hub – Food Delivery App — Full-featured food delivery web app with Paystack integration, real-time delivery tracking, and a smooth intuitive ordering experience. [Live →](#)

Opulent Threads – E-Commerce Platform — Responsive fashion store built with TypeScript, Tailwind CSS, and Shadcn UI. Integrated Paystack payment gateway, order management, and delivery tracking. [Live →](#)

Real Estate Listing Platform — Property discovery platform with advanced search and filter functionality, powered by Node.js and MongoDB. [Live →](#)

Healing Hearts – Quote App — Calming motivational quote app built with TypeScript and Tailwind CSS, featuring curated content and intuitive navigation. [Live →](#)

Vibea – Social Platform — Social media app with dynamic feeds, post creation, and user interaction features. Modern responsive UI built with JavaScript and Tailwind CSS. [Live →](#)

GameNova Web Store — E-commerce game store with full cart and checkout flow. Optimised for smooth browsing and a responsive shopping experience. [Live →](#)

Cool Flow Digital – Brand Website — Modern, responsive brand website with engaging animations and mobile-first layouts. Built with React.js and Tailwind CSS to enhance brand presentation and user experience. [Live →](#)

Wedding RSVP System — Full-stack guest management and event coordination platform. Features RSVP tracking, invitation management, and real-time updates for seamless wedding event administration. [Live →](#)

To-Do List / Bucket List App — Task management system with persistent storage supporting task creation, updates, and completion tracking. [Live →](#)

AI Health Assistance System — Mobile healthcare app with AI chat, emergency alerts, medication tracking, and caregiver notifications. Supports multilingual interaction in Hausa, Yoruba, and Igbo. Built mobile-first for accessibility and real-time response.

KEY ACHIEVEMENTS

- Designed and delivered 10+ production-ready full-stack applications across e-commerce, social media, productivity, real estate, and healthcare.
- Implemented secure Paystack payment integration enabling real-world transaction flows across multiple platforms.
- Engineered a mobile AI-powered health assistant with multilingual support (Hausa, Yoruba, Igbo) and real-time emergency features.
- Built and deployed scalable applications using React.js, TypeScript, Node.js, and Vercel.
- Demonstrated full lifecycle development capability: idea → design → development → deployment → maintenance.
- Contributed to real-world production systems in contract roles, including debugging, testing, and system integration.

EDUCATION

B.Sc. Computer Science — Veritas University, Abuja, Nigeria 2021 – Present

Relevant Coursework: Data Structures & Algorithms, Distributed Systems, Software Engineering, Database Management

INTERESTS

Gaming (Console & PC) · Mobile & Web Technology Exploration · UI/UX Design · Creative Coding · Mentoring & Community Engagement
